Mecalbi

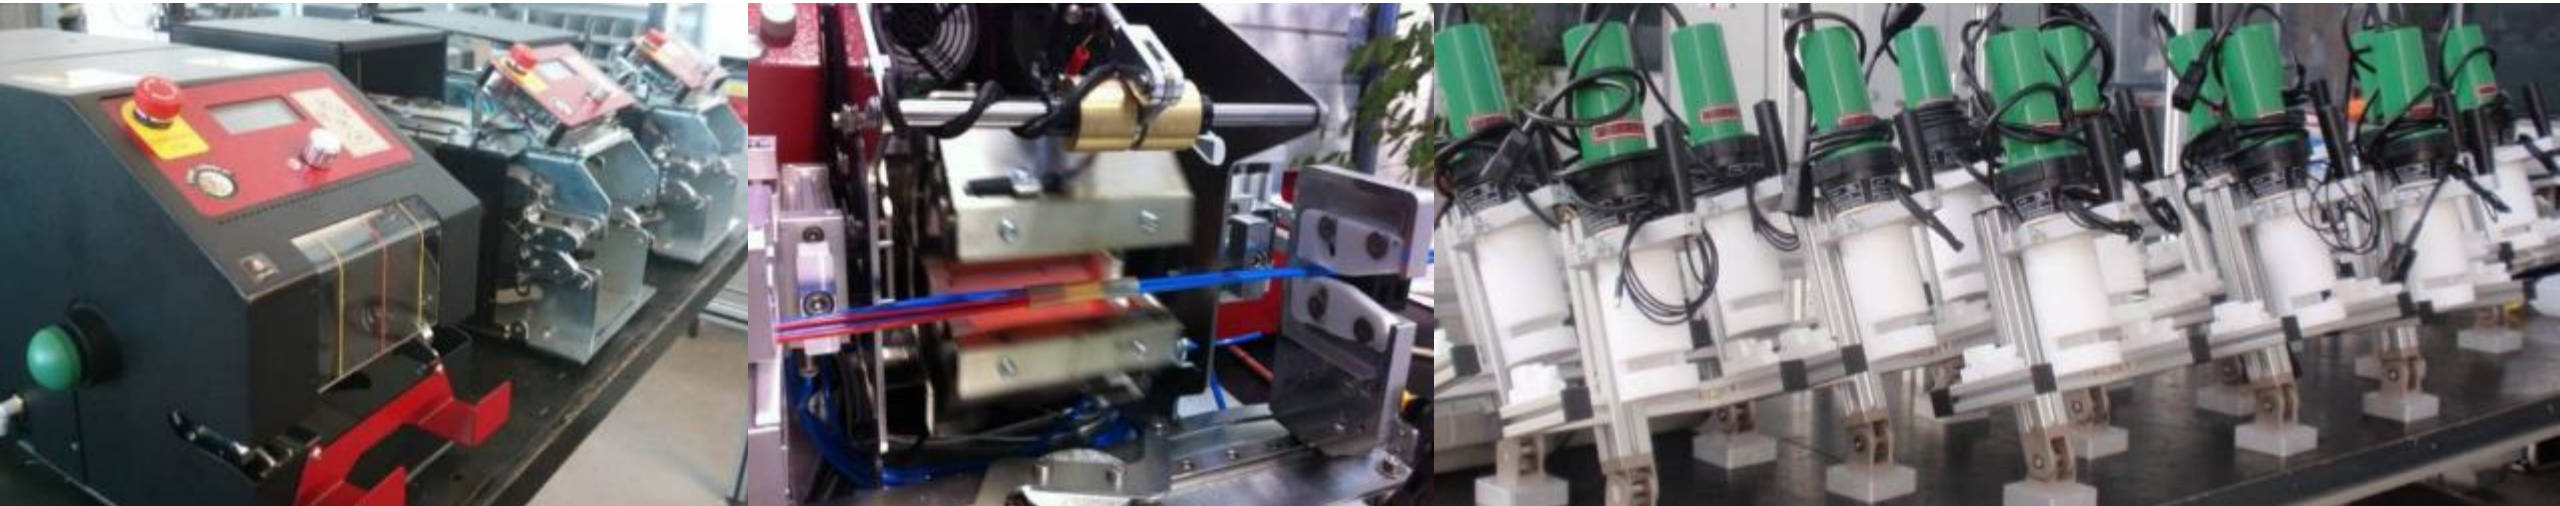

Zona Industrial de Castelo Branco
Rua J Lote N14, Módulo A,
6000-459 Castelo Branco - Portugal
comercial@mecalbi.com

- More than 20 faithful customers;
- 99% volume of production for exportation;
- Worldwide sales;
- Represented by partners (commercially and technically) in Europe; Africa; America; Asia.

MECALBI IS SPECIALIZED IN THE DEVELOPMENT AND PRODUCTION OF HEAT SHRINK TUBE PROCESSING MACHINES.

- Development and production of shrinking systems – **STCS - Product Range**
- Design and development of custom projects in the Mechatronics' area

MECALBI

Clients

LEONI

Lead Times

Four weeks for machines.
One week for spare parts.

Service

Direct contact and
quick feedback.

Flexibility in Customization

Always available to implement custom
solutions based on the client needs.

Range of Products

Our range of products covers the entire spectrum of heat shrink tube
processing machines. All products use the same user/operator
interface, which translates into a very fast learning curve.

Competitive Prices

Reactivity

When a client asks for last minute changes,
we always adapt.

Research and Development

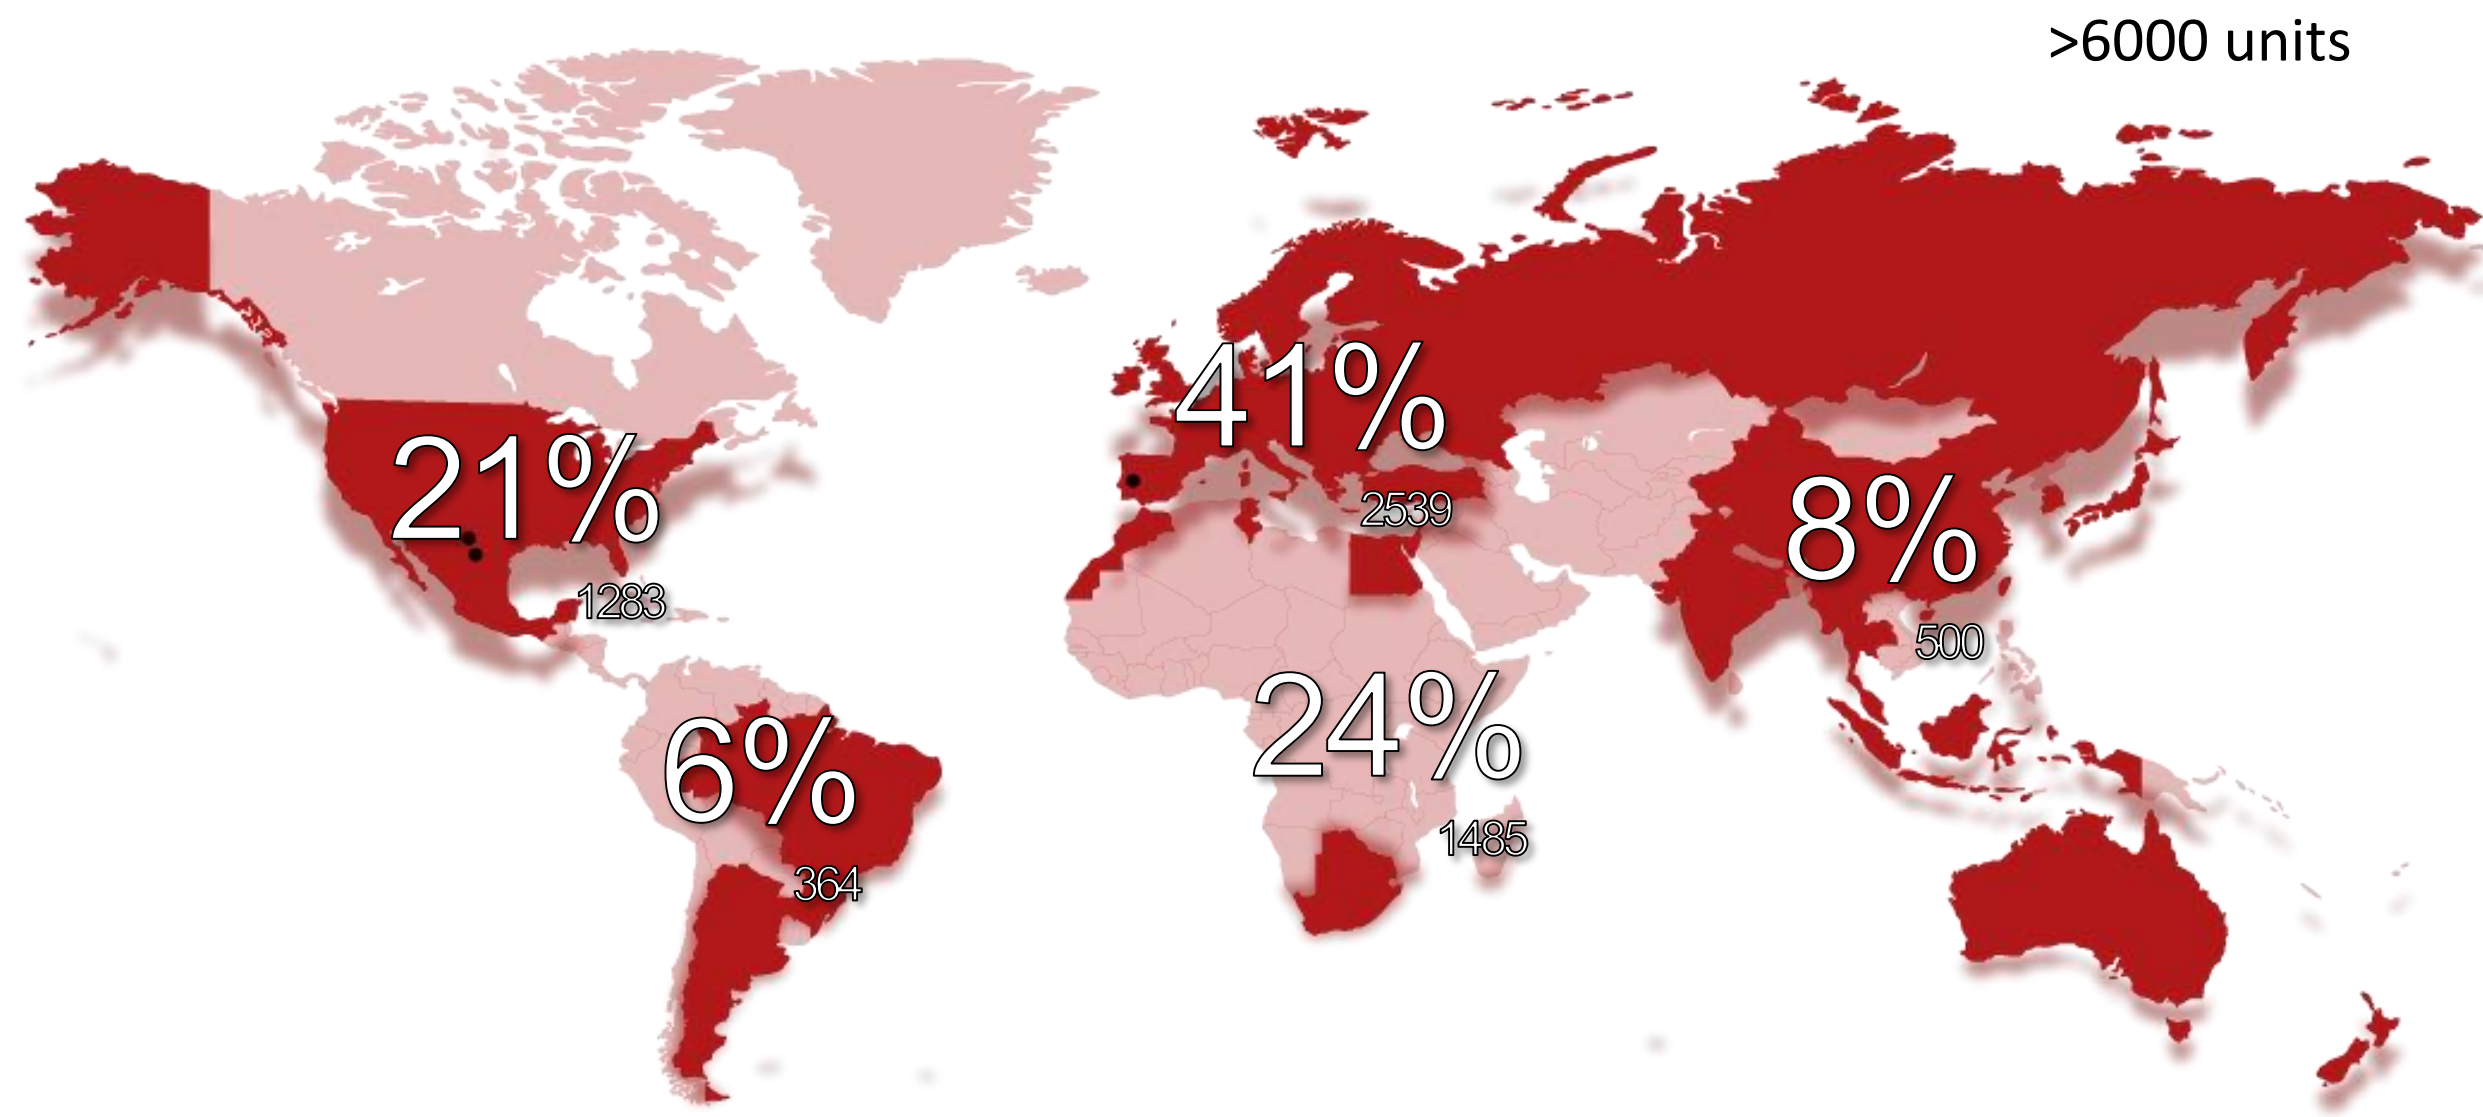

Two new solutions in the market
each year.

Technology

Our products integrate state of the art
technology.

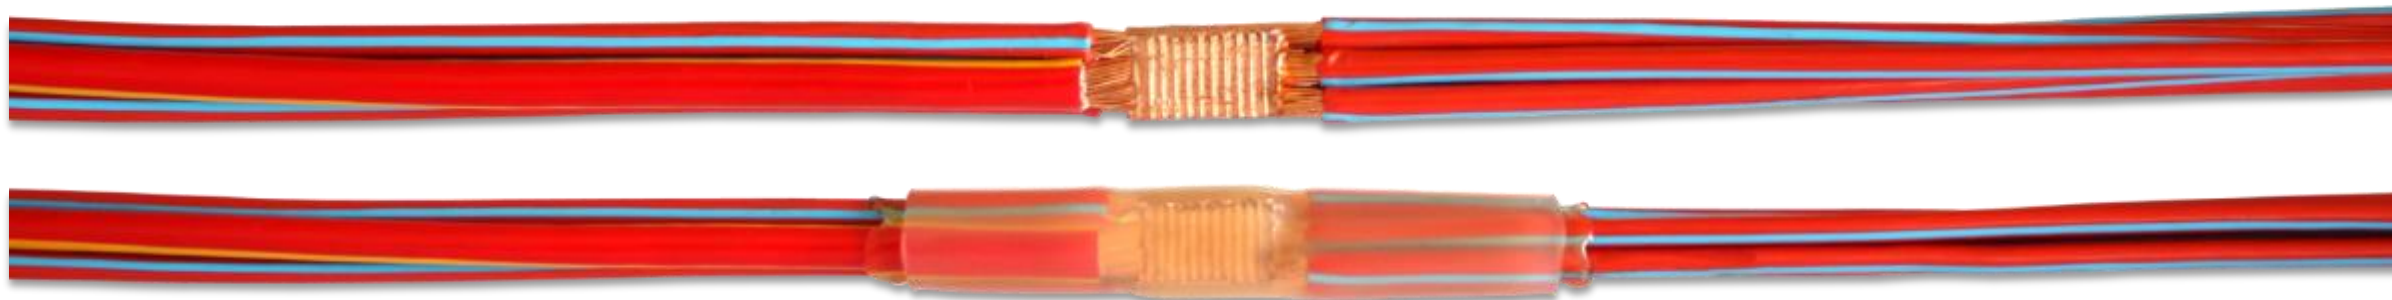

STCS Overall – n° of machines (as of 12/2019)

STCS Product Range

THE SHRINKING TUBES ARE USED TO PROTECT AND INSULATE THE TERMINALS AND WELDED JUNCTIONS OF THE HARNESS

Time saving

During the shrinking process, the operator is free to perform other tasks.

Process Control

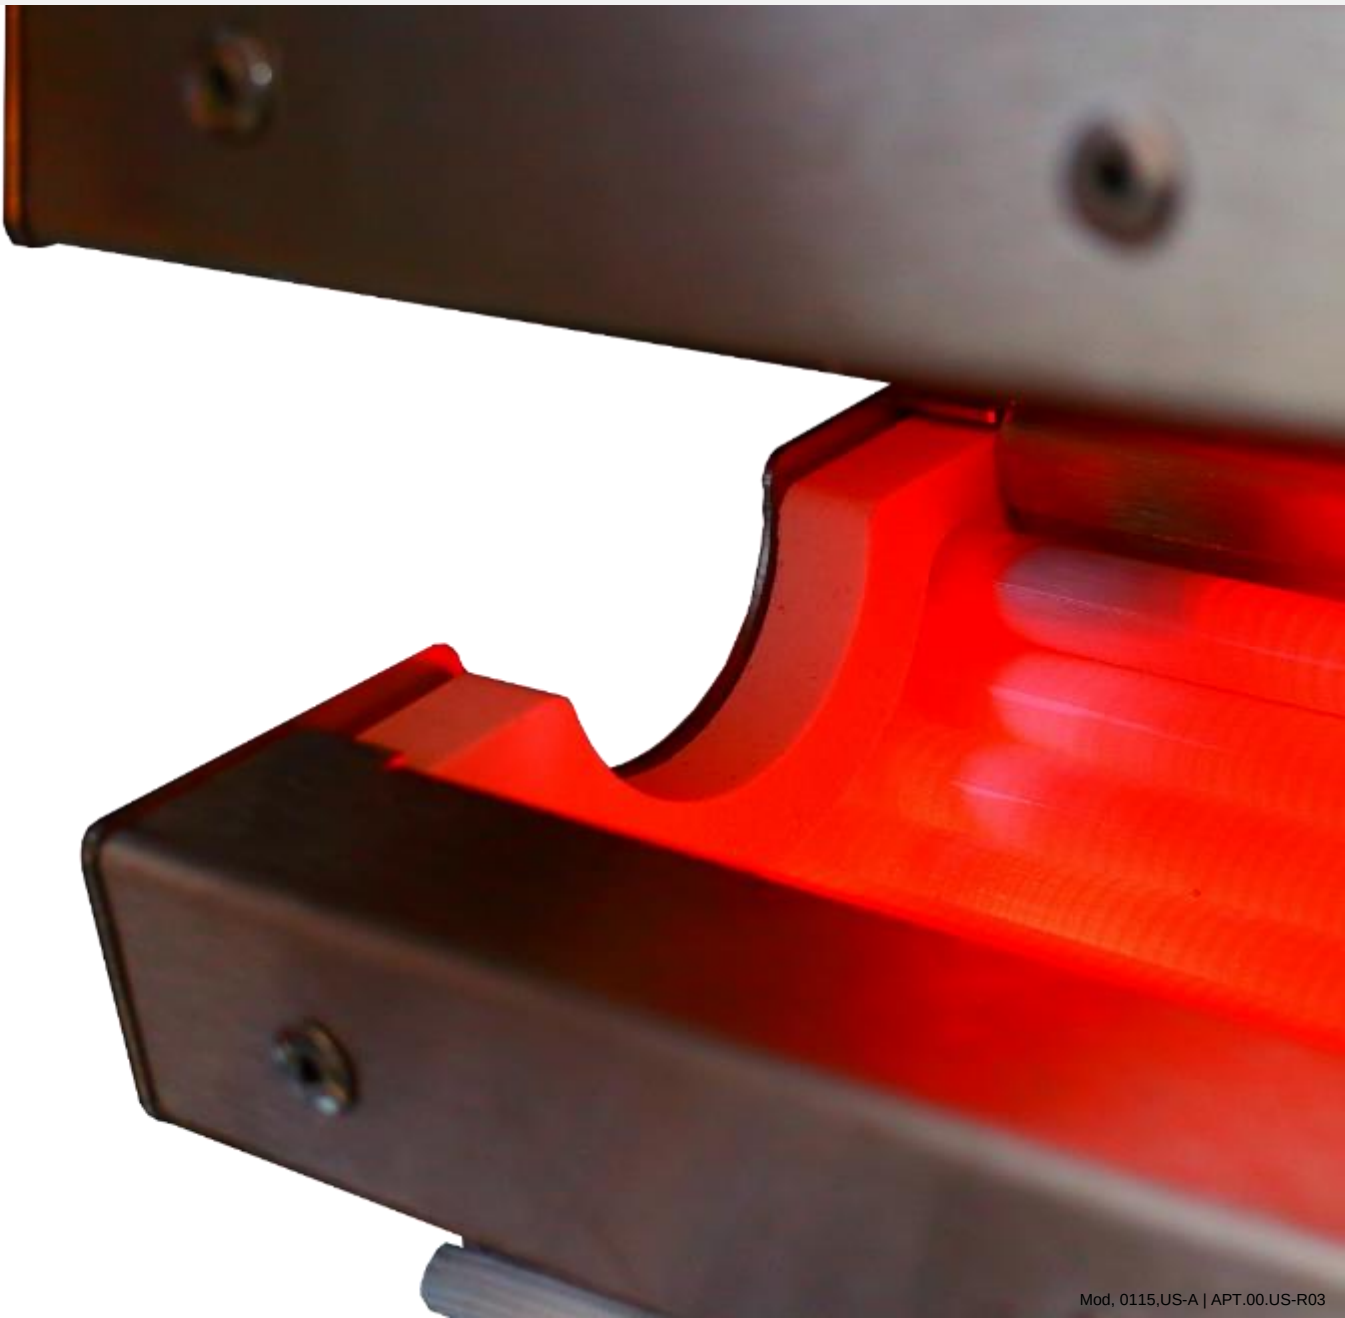

Reliability and consistency of the process by monitoring and controlling the system's temperature, shrinking time and position of the sleeve.

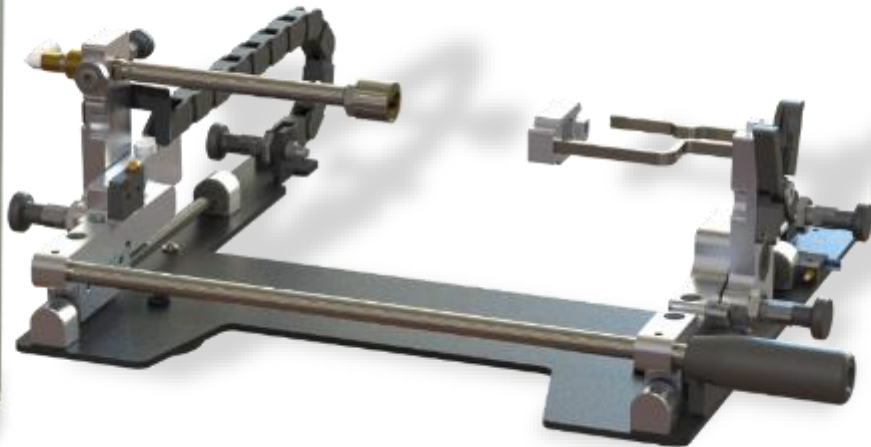

Safer

The operator is protected against injuries.

Infrared Technology

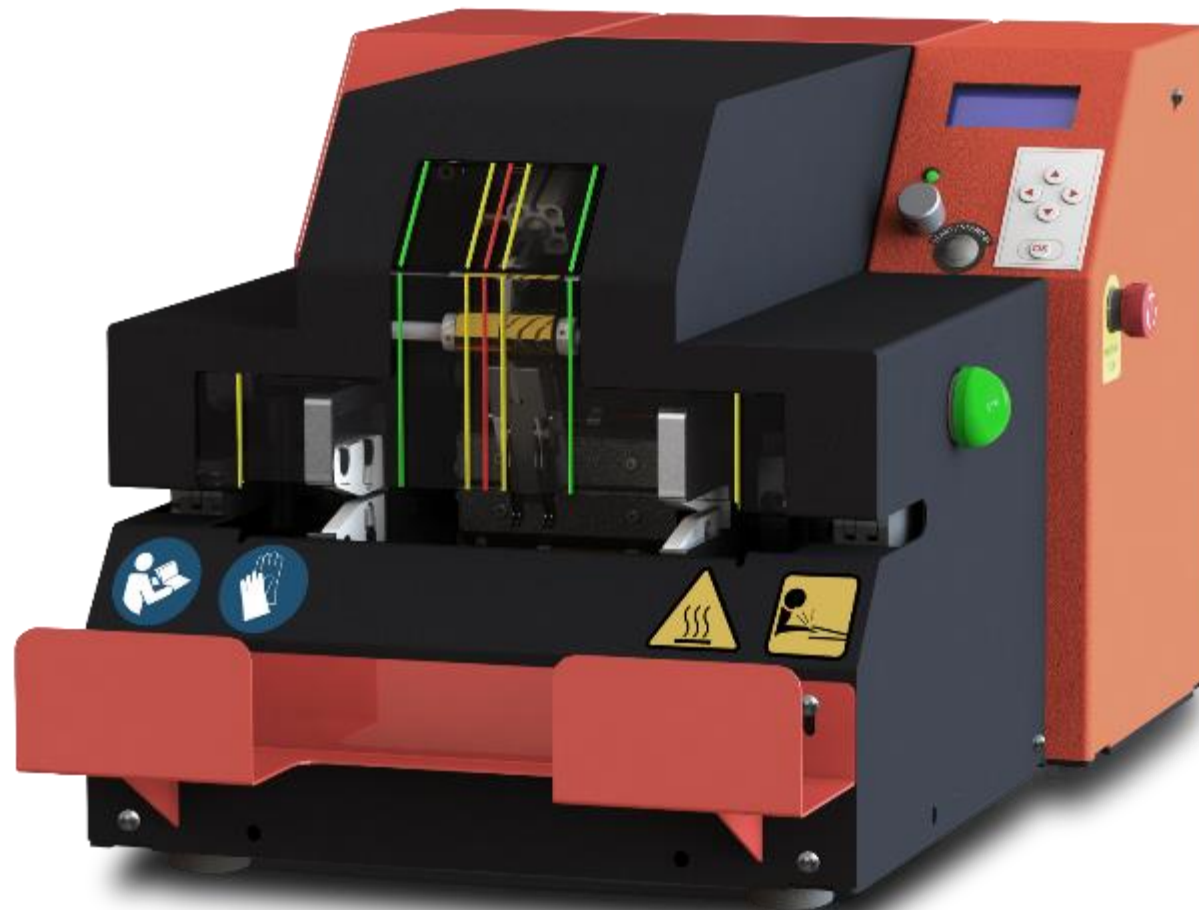

For faster and better quality shrink.
Evo500 is our most popular system using
this kind of technology.

STCS-LC

(Standard Equipment)

DIMENSIONS

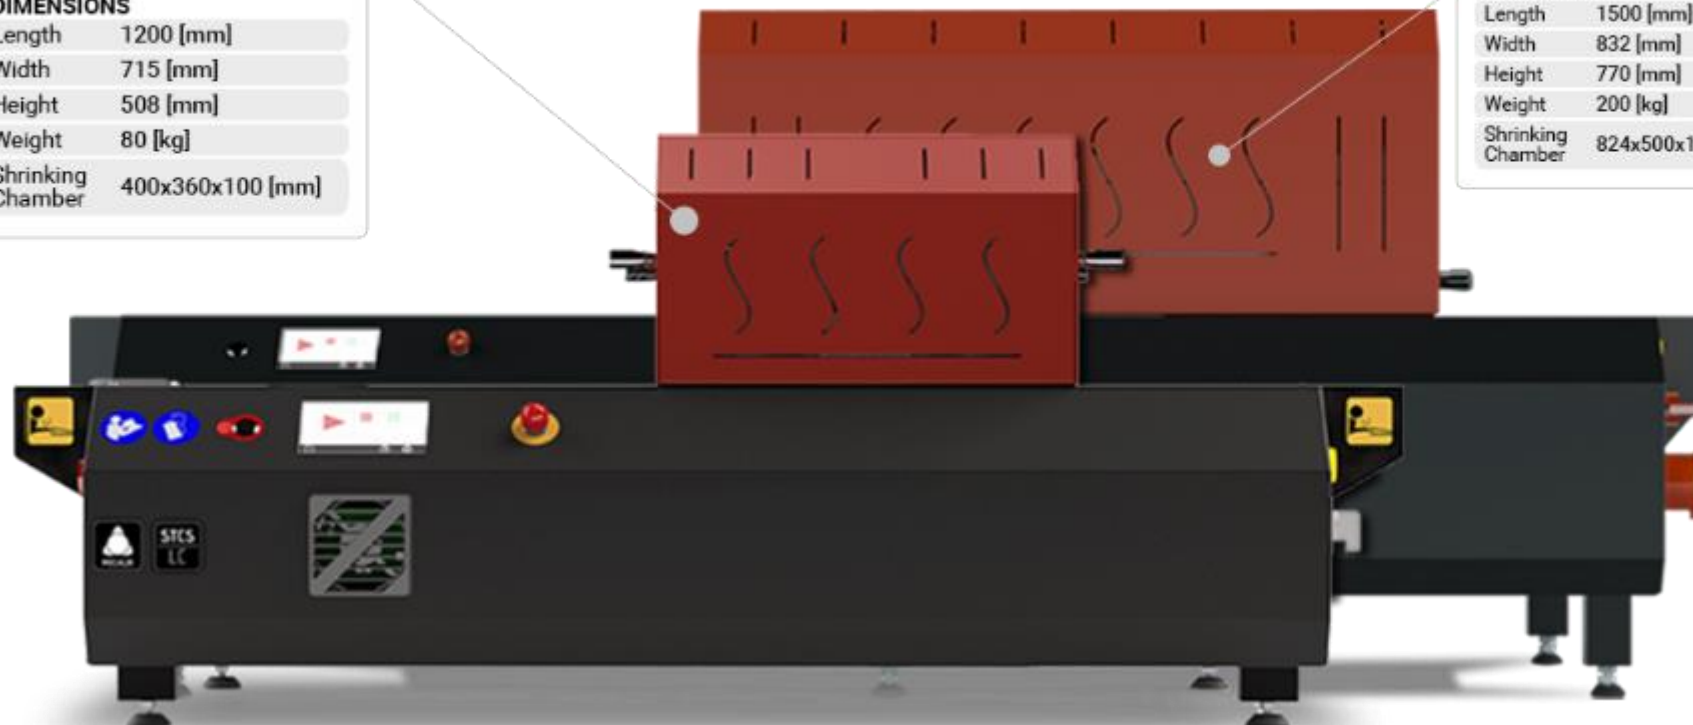

Length	1200 [mm]
Width	715 [mm]
Height	508 [mm]
Weight	80 [kg]
Shrinking Chamber	400x360x100 [mm]

STCS-LC XL

(Special Equipment)

DIMENSIONS

Length	1500 [mm]
Width	832 [mm]
Height	770 [mm]
Weight	200 [kg]
Shrinking Chamber	824x500x145 [mm]

Hot Air Technology

Great flexibility in customization and the same
excellent quality shrink for less value.
A system designed specially for you!

STCS-VM

Test Systems

Test solutions for quality insurance.
Sealing and poke through testing
for the most demanding tasks.
